8.2. Exposure controls

According to the requirements of Directive 98/24 /EC, the employer is required to conduct a risk assessment and implement appropriate risks management measures.

* For any situation where the absence of risk is not proven, he must consider the substitution or reduction of risk by improving in priority processes used and collective protection measures. The effectiveness of the solutions implemented will be checked by measurement in comparison to the statutory limit values for substances defined in Section 8.1.

* If the risk remains after these corrective actions, he must always check by routinely measuring compliance with regulatory OEL if they exist in section 8.1 and apply all the individual protective measures given in section 8.2.

* When formalized risk assessment indicates a low risk to workers' health, control of compliance with regulatory OEL may not be considered and all individual protection measures is not always mandatory.

8.2.1. Appropriate engineering controls :

Ensure adequate ventilation.

Apply the necessary technical measures to comply with the professional exposure limit values.

8.2.2. Individual protection measures, such as personal protective equipment :

Eye/face protection :

Wear safety goggles compliant with standard EN 166.

Hand protection :

Wear chemical resistant protective gloves (for example in vinyl alcohol, nitrile rubber, polychloropropene)

Skin protection :

To choose the means of body protection according to the activity and the type of exposure, for example: apron, boots, combination of protection against the chemicals conform to the standards INTO 465,466468

The user must determine the Individual protection equipments adequate according to his analysis of the risks and in collaboration with the suppliers of E.P.I. Taking into account the diversity of the types, it is necessary to respect the instructions of the manufacturers. Procedures of work must be established to minimize the contact of the operator with the product: shower, ocular fountain near the places of work and systematic washing of the individual protection equipments after each use.

To handle in well ventilated zones.

Prohibit contact with skin and eyes and inhalation of vapours.

After using, wash systematically all personal protective equipment.

After contact with skin, wash immediately and abundantly with water and soap, use neither abrasive product, nor solvent, nor fuel.
