ARROWQUIP

WHY ARROWQUIP?

The 400 Series cattle crushes were created to provide practical farmers with straightforward cattle handling solutions that do not compromise safety and quality for affordability. Unlike anything else in the market, Arrowquip's 400 Series crush lineup gives farmers the opportunity to step up their operation using equipment designed with precision engineering and animal science.

MODEL: DELUXE VET [7400]

WEIGHT: 862 kg

DIMENSIONS: 1418mm w x 2413mm h x 3285mm l

MODEL: STANDARD [7400MR]

WEIGHT: 762 kg

DIMENSIONS: 1418mm w x 2413mm h x 2606mm l

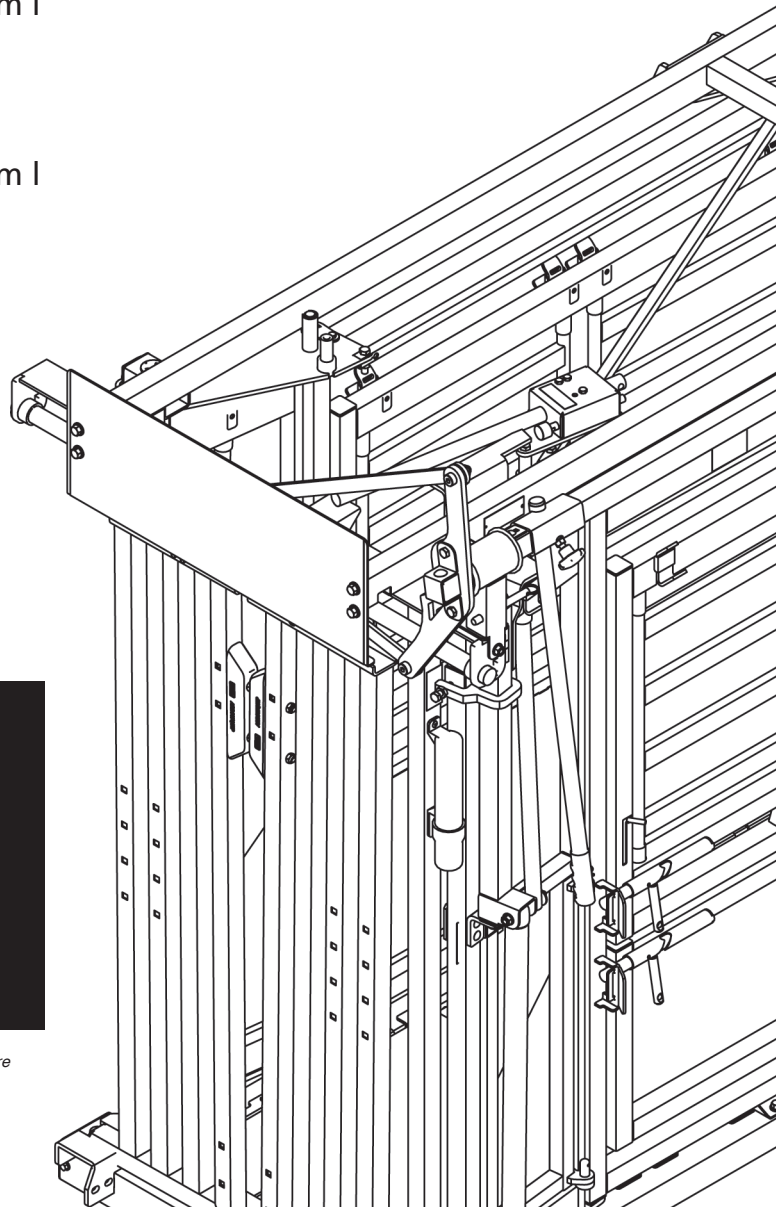

THE EASIEST WAY TO IMPROVE YOUR FARM

The Q-Catch 74 Series is where safety, reliability, and productivity meet. Making cattle handling easier, the Q-Catch 74 Series serves as a reliable and efficient option for practical ranchers that want all the features at a lower price point. Complete with the same patented auto-locking mechanisms, full access points, and user-friendly features you find in a Q-Catch, you can trust this manual squeeze crush to get the job done right. Work your cattle confidently, knowing that your crush is made to stand the test of time.

PRODUCT WARRANTY

- Manual cattle crush - **10 YEARS OR 25,000 TOTAL HEAD OF CATTLE**
- Patented yoke gate friction locks – **LIFETIME**
- Patented squeeze friction locks – **LIFETIME**
- Rubber floor – **LIFETIME**
- Rump fingers – **LIFETIME**

Products must be registered to claim warranty. Contact your Authorised Arrowquip Dealer for more information.

3E Q-CATCH YOKE GATE [PATENTED]

- Uses light to draw cattle into the crush
- Barred style allows cattle to see light past the yoke gate
- Patented locking mechanism features infinite adjustments
- Self-lubricating yoke gate rollers are maintenance-free
- Opens to a full 736mm top to bottom
- Single lever push-to-close, pull-to-open operation never requires adjustments

YOKE GATE OPERATION HANDLE

- User-friendly handle that reduces operator's fatigue
- Handle can be situated anywhere along the side of the crush

DIRECT DRIVE SYSTEM [PATENTED]

- Enhanced design provides a direct connection from the control tube to the yoke gate
- Provides instant yoke gate response time
- Yoke gate operation can be easily converted* to the opposite side

*Requires additional parts. See product manual.

**REMOVABLE AND
CONFIGURABLE
IN 7 WAYS**

**CAN BE USED
INDEPENDENTLY
OR TOGETHER**

**324MM OF ACCESS
TOP TO BOTTOM**

RUMP FINGERS

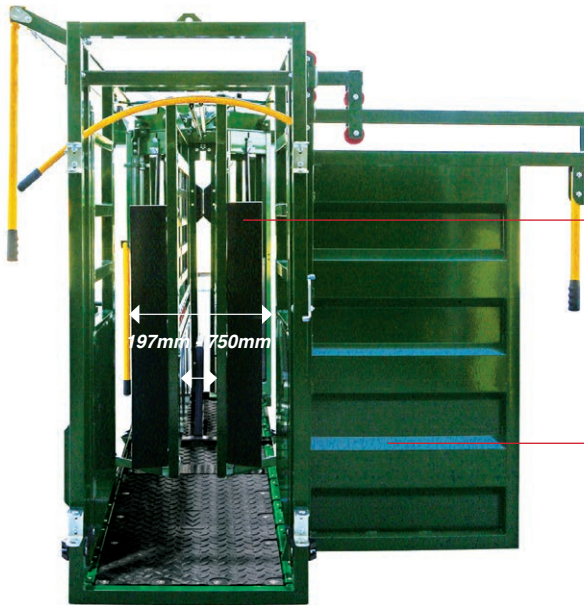

- Nylon rump fingers designed to endure high pressure
- Includes a heavy-duty rubber-coated fiberglass rump bar that is light and slip-resistant

TB ACCESS [PATENT-PENDING]

- Drop-down needle bar allows for quick access to the neck
- Completely removable panel

FLOORING [PATENT-PENDING]

- Patent-pending flooring made in North America from the highest-grade rubber materials – **LIFETIME WARRANTY**
- Maintenance-free, molded rubber flooring
- Quietest flooring system on the market today
- Fully replaceable

SQUEEZE

- Single lever push-pull operation
- Designed to work with cattle of any size
- Patented lockbox on the squeeze offers infinite adjustments - **LIFETIME WARRANTY**

ROLLING TAIL GATE

- Reversible offside & onside operation
- Top-mounted to eliminate the issue of build-up

MOUNT BRACKETS

- Allows you to place the crush on load bars for weighing cattle
- Can be used to secure the crush to the ground with bolts

VET DOOR

- Improved slam latch ensures the door won't swing through when slammed shut

ADD-ONS

3RD GENERATION HEAD SCOOP [PATENTED]

The 3rd Generation Head Scoop is a sturdy mechanism that clamps around the animal's neck, immobilizing the head. Featuring an upgraded design with thicker, heavier components and a single-lever push-pull operation, the head scoop simplifies any procedure requiring access to the animal's head.

CALF RESTRAINER BAR

The Calf Restrainer Bar provides added safety when banding, trimming or branding cattle by tucking into the hip joint, immobilizing the hip. You can adjust the position and angle of the bar along the side of the crush to quickly adjust to different sizes of cattle.

STERNUM BAR

The sternum bar prevents cattle from going down in the crush. The improved design is sheeted to prevent hoof traps, and is easily installed or removed with 2 bolts.

BULL CATCHER

Add a focused pressure point to the yoke gate with the Bull Catcher to make catching and securing bulls, cows, and calves as easy as possible.

RUBBER NECK CUSHION KIT

Add the Rubber Neck Cushion Kit to your yoke gate to help reduce the chance of shoulder bruising and for added shock absorption.

Arrowquip has been creating best in class livestock equipment since 1988 through an extensive research and development process that is unmatched in the cattle industry. We employ the only team of engineers specifically dedicated to cattle handling, and are constantly improving our equipment to adhere the latest recommendations from key researchers and cattle handling experts.

Every piece of equipment we design is intended to make managing your cattle faster, easier, and safer every step of the way. Why does that matter?

Easier. Working cattle is hard enough. Why make it harder on yourself with equipment that is difficult to use and requires frustrating adjustments? Our equipment is designed with ease of use for the operator in mind, with ergonomic handles and far less adjustments, to make working your cattle easier than ever before. You don't need to be 6' tall to use our equipment, either!

Faster. Too many cattle handling systems are designed without consideration for natural cattle behaviour, which results in stubborn cattle

that refuse to move effectively. Arrowquip equipment works with animal science to get cattle to move through the handling system without delays, thanks to unique features like our patented 3E System that uses light to draw cattle from forcing pen to crush.

Safer. Good help is hard to find, and getting harder every day. When you're out in the field with your kids, your brother, or your wife, you need equipment you can trust every step of the way. There is no room for error. Our equipment is designed with safety for handlers and cattle in mind, and undergoes extensive testing to ensure the equipment is reliable for your farm.

From crushes for cattle to custom cattle working systems and pens, Arrowquip has a solution for all your cattle handling needs. For added security, our equipment is backed by industry-leading warranty. Let our generations of farming experience and knowledge of cattle behaviour help you develop a more efficient and profitable operation today, tomorrow, and for years to come.
